

AZHL

MINUTES OF MEETING

Control Panel, Dashboard and Mobile Application Updates

PROJECT	MEETING DATE	PREPARED BY
Azhl	29 July 2026	Stackbuffers Team

MEETING OVERVIEW

The meeting covered new control panel notifications, company user and role management, dashboard reporting, receipt downloads, and payment-related requirements that have been deferred for a later phase.

9	3	3
DISCUSSION AREAS	FIRST-TIME ITEMS	DEFERRED FEATURES

Discussion Summary

Detailed decisions, requirements, first-time discussion items, and deferred features.

1 Control Panel Notifications

A notification icon will be added next to the Azhl logo in the control panel.

The notification section should display alerts related to:

- Activation requests
- New messages
- New marketplace registrations
- Relevant system tasks and activities

2 Send Notifications

The control panel should allow the administration team to send notifications to:

- Customers/Users
- Service Providers
- Marketplace Sellers

3 Company Users and Roles

FIRST-TIME DISCUSSION

The following company account and user-management requirements were discussed:

- Create company users with the required personal and account information.
- Assign service provider accounts to the relevant company user.
- Allow company users to monitor their assigned service providers.
- Allow company users to print receipts.
- Display company-related statistics, including:
 - Number of service requests
 - Number of submitted bids
 - Number of associated service providers

NOTE: These company user and role requirements were discussed with the Stackbuffers Team for the first time

Dashboard and Commercial Items

Dashboard reporting requirements and payment-related items discussed for a later implementation phase.

4 Dashboard

The following dashboard improvements and statistics were discussed:

- Apply the official application colors to the dashboard.
- Display the providers who submit the highest number of bids.
- Display the providers who have completed the highest number of tasks.
- Display the marketplaces that have received the highest number of orders.
- Display the highest-rated service providers.
- Display the highest-rated marketplaces.
- Replace the Active Campaigns section with a Registered Marketplaces section.

5 Marketplace Registration Fee

DEFERRED

A yearly registration fee of SAR 100 per marketplace was discussed.

This requirement was discussed with the Stackbuffers Team for the first time.

Majed confirmed that this feature should be skipped for now. It will be implemented later when the payment functionality is developed.

6 Tax/VAT

DEFERRED

A dashboard section was discussed to display the total Tax/VAT amount that is required to be paid.

This requirement was also discussed with the Stackbuffers Team for the first time.

Majed confirmed that the Tax/VAT functionality should be skipped for now and implemented later as part of the payment-related development.

Mobile Application and Deferred Work

Mobile testing status, receipt evidence, and payment features scheduled for a future phase.

7

Mobile Application

TESTING PENDING

No new points related to the previously completed mobile application work were discussed. Testing of the existing mobile application work is still pending from Majed's side.

8

Receipt Download

A new Download Receipt button should be added for:

- Marketplace orders
- Service provider orders

NOTE: The downloaded receipt will serve as transaction and order evidence.

9

Deferred Payment Features

DEFERRED

The following features will not be implemented at this stage:

- SAR 100 yearly marketplace registration package
- Marketplace registration payment collection
- Tax/VAT calculation and reporting

NOTE: These features will be reviewed and implemented when the payment module is developed.
